

Household Youth Safety Plan

Youth 18 and older placed in foster care are defined as vulnerable adults by the Minnesota Vulnerable Adult Act (Minnesota Statutes 626.557), and must be provided a safe environment in the foster home.

Any suspected cases of abuse or neglect will be reported to the common entry point of _____ County, and/or local law enforcement at _____ .

Foster parents and any other adult responsible for supervision of youth will complete Vulnerable Adult Law training annually and maintain this Household Youth Safety Plan in the foster home.

The youth's Circle of Support/Support Team will assess vulnerability and risk of harm to others served by the program, and develop a Youth Safety Plan for each youth 18 and older. The plan will guide appropriate supervision and provision of care.

Youth will be oriented to both plans within 72 hours of placement or their 18th birthday. Legal representatives of youth will be notified of the orientation.

Any risks in the foster home and environment are identified below with a plan to prevent abuse/neglect.
